WORKING EXPERIENCE

As a full-stack developer with less than a year of experience, I'm accustomed to building web applications that combine front-end and back-end functionality. I'm skilled at transforming concepts into practical applications by leveraging modern technologies, including JavaScript, React, Node.js, and SQL/NoSQL databases. I focus on developing user-friendly, efficient, and scalable solutions. I'm committed to continuously improving my technical skills and contributing to impactful projects through innovation and team collaboration.

WORKING EXPERIENCE

Freelance, Surabaya

Des 2024 – Present

Full-stack Developer

- Develop simple web applications with front-end (React, HTML, CSS, JavaScript) and back-end (Node.js, Express) integration.
- Experienced in using SQL and NoSQL databases to store and manage data.
- Apply clean code principles and best practices to ensure application quality and scalability.
- Collaborate on small team projects using agile/scrum methods, focusing on efficiency and communication.
- Committed to continuous learning in full-stack technologies and the development of impactful digital products.

PT. Planet Asa Sentosa, Lamongan

Jan – Jun 2022

Mobile Application Dev (Internship)

- Collaborate with the marketing team to translate digital promotion needs into interactive features on the application.
- Build push notification features for the latest unit promotions, discounts, or open house events.
- Develop search and filter features for units based on price, house type, land/building area, and location.
